GENETIC COUNSELORS:

PRACTICE-BASED COMPETENCIES

I. GENETICS EXPERTISE AND ANALYSIS
1: Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.
2: Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.
3: Construct relevant, targeted and comprehensive personal and family histories and pedigrees.
4: Identify, assess, facilitate, and integrate genetic testing options in genetic counseling practice.
5: Assess individuals’ and their relatives’ probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.
6: Demonstrate the skills necessary to successfully manage a genetic counseling case.
7: Critically assess genetic/genomic, medical and social science literature and information.

II. INTERPERSONAL, PSYCHOSOCIAL AND COUNSELING SKILLS
8: Establish a mutually agreed upon genetic counseling agenda with the client.
9: Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.
10: Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.
11: Promote client-centered, informed, non-coercive and value-based decision-making.
12: Understand how to adapt genetic counseling skills for varied service delivery models.
13: Apply genetic counseling skills in a culturally responsive and respectful manner to all clients.

III. EDUCATION
14: Effectively educate clients about a wide range of genetics and genomics information based on their needs, their characteristics and the circumstances of the encounter.
15: Write concise and understandable clinical and scientific information for audiences of varying educational backgrounds.
16: Effectively give a presentation on genetics, genomics and genetic counseling issues.

IV. PROFESSIONAL DEVELOPMENT & PRACTICE
17: Act in accordance with the ethical, legal and philosophical principles and values of the genetic counseling profession and the policies of one’s institution or organization.
18: Demonstrate understanding of the research process.
19: Advocate for individuals, families, communities and the genetic counseling profession.
20: Support client and community interests in accessing, or declining, social and health services and clinical research.
21: Understand the methods, roles and responsibilities of the process of clinical supervision of trainees.
22: Accept responsibility for one’s physical and emotional health as it impacts on professional performance.
